

ANIKET SINGHAL

Software Engineer | Flutter (Android & iOS) | MERN Stack

Delhi, India • +91 9311764547 • ssinghalaniket@gmail.com • linkedin.com/in/aniketsinghal17 • github.com/AniketS1712

PROFILE SUMMARY

Software Engineer with a strong foundation in OOPS, Data Structures & Algorithms, and Database Design. Experienced in building scalable, real-time applications with Flutter and the MERN Stack, using REST APIs, Firebase, WebSockets, and Supabase. Solved 75+ DSA problems on LeetCode (Java); Google UX Design Certified. Comfortable applying AI-assisted development and GenAI tools to improve engineering productivity. Quick to pick up new languages and frameworks as needed.

TECHNICAL SKILLS

Programming & CS Fundamentals Java, C + + , OOPS
Mobile Development Flutter, Dart, State Management (Provider / Riverpod), REST API Integration
Web Development React.js, Node.js, Express.js, JavaScript, HTML, CSS, WebSockets
Databases MongoDB (NoSQL), Firebase Realtime Database, Cloud Firestore, Supabase(SQL)

WORK EXPERIENCE

Front-End Intern — IBM SkillsBuild

Remote | 3 Months

- Led a cross-functional team through the complete web design & development lifecycle for a marine life conservation project aligned with UN SDGs — from requirements gathering and wireframing to agile sprint coordination and final delivery.
- Built a responsive, accessibility-compliant UI using **HTML, CSS, and JavaScript** with modular, reusable components, ensuring cross-device compatibility and modern front-end standards.
- Delivered the polished product **2 weeks ahead of schedule**, demonstrating ownership, time management, and effective team leadership within an agile workflow.

PROJECTS

Eagle Esports — Tournament Management Application (Flutter, Riverpod, Node.js/Express, Supabase)

github.com/AniketS1712/Eagle_Esports

- Architected a full-stack Free Fire tournament platform with PostgreSQL schema (Supabase), enforcing data integrity and tournament-state transitions server-side via Row-Level Security policies, database triggers, and lifecycle RPCs.
- Designed a non-withdrawable in-app currency (1:1 with INR) for entry fees and merchandise, structured to keep the product outside India's real-money-gaming regulatory scope — early exposure to financial/regulatory constraints in product design.
- Built an organiser dashboard for tournament creation, match/leaderboard tracking, and team management, powered by realtime Supabase StreamProviders for live score and leaderboard updates across clients.

Business Monopoly Board Game — Flutter (Android & iOS)

github.com/AniketS1712/BusinessGame

- Architected a multiplayer business simulation game applying core OOP principles — inheritance and encapsulation — to model players, properties, and financial transactions in a clean, maintainable class hierarchy.
- Implemented turn-based game logic using arrays and custom data structures to manage player state, turn order, dice events, and board progression, demonstrating strong DSA fundamentals.
- Used Provider for reactive state management and integrated Firebase Realtime Database + Cloud Firestore for live multi-user game synchronisation across Android and iOS, with smooth animations and state transitions.

EDUCATION

Master of Computer Application (MCA)

2025 – Pursuing (Batch 2027)

Jagan Institute of Management Studies | CGPA: 9.2

Bachelor of Computer Application (BCA)

2022 – 2025

Banarsidas Chandiwalla Institute of Information Technology | CGPA: 9.1

Class XII — CBSE

2020 – 2022

Rukmani Devi Jaipuria Public School | 73%

CERTIFICATIONS

- Google UX Design Professional Certificate — Coursera / Google
- Intellectual Property Rights Workshop
- Web & Software Development Challenge
